

serving the needs of  
**audio-visual equipment**  
industry leaders

## High performance, user-friendly and cost-effective solutions

Audio-visual industry leaders are known for their ability to turn science-fiction into reality, to make pipe dreams see the light of day. Whether it's streaming live pictures and sound around the world for a teleconference or storing a movie on a handheld device, the technological breakthroughs developed by A/V innovators have changed the world in less than a generation. In an age when consumers have come to expect to pay less for more user-friendly, high-performance A/V devices, equipment manufacturers must be able to create products that can do more, are easier to use, and cost less than yesterday's hot product. Fortunately, Buckeye Shapeform is in the business of helping audio-visual industry leaders do just that.

As a leader in the creation of enclosures for audio-visual equipment manufacturers, Buckeye Shapeform has a reputation for its ability to create complex, user-friendly enclosures for high-performance A/V applications in a manner that is both higher-quality and more cost-effective than its competitors. And to help you meet consumer demand for low-cost solutions that do more, Buckeye Shapeform does more, faster, in ways that our competitors simply can't...or won't.

### High performance

#### Demanding solutions

Audio-visual industry leaders know that consumers not only demand more from their products than ever before, but they require solutions that can be seamlessly integrated with other A/V applications. In other words, high-performance A/V products facilitate the integration of multiple components in auto, home, business and educational settings. And to help A/V equipment manufacturers provide such complexity to consumers, Buckeye Shapeform's high-performance enclosure customization services are unmatched in the industry.

**The way in which consumers interface with A/V devices is at once more simple and more complicated as a result. A/V solutions must do more, so the enclosures must also do more. Buckeye Shapeform is uniquely positioned to create enclosures that house any level of electronic complexity while maintaining the ease-of-use for end users.**

### Seamless integration

Because consumers want high-performance audio/visual solutions, Buckeye Shapeform creates high-performance A/V enclosures. Our high-performance fabrication processes allow us to:

- Customize existing enclosures
- Create custom enclosures from scratch for your specific applications

And just as you deliver products that integrate seamlessly into consumers' lives, Buckeye Shapeform's streamlined production processes and engineering expertise allow us to create high-performance enclosures to seamlessly integrate into your product and service lines.

**Buckeye Shapeform has become an industry leader by making it quick, easy, and cost-effective for audio-visual equipment manufacturers to source cases that are ready for installation.**

### User-friendly

#### Simple interfaces

Thanks to the creativity and design prowess of A/V industry leaders, the days of the complicated VCR programming manual have long passed. As more and more people adopt the use of A/V devices in our media-saturated world, A/V devices must also be more user-friendly. The way in which consumers interface with A/V devices is at once more simple and more complicated as a result. A/V solutions must do more, so the enclosures must also do more. Buckeye Shapeform is uniquely positioned to create enclosures that house any level of electronic complexity while maintaining the ease-of-use for end users.

#### Functional design

In fact, our design process is even user-friendly. Our clients know that Buckeye Shapeform can:

- Fabricate to your specifications
- Work with you to design an enclosure that is both user friendly and functional
- Offer unmatched levels of technical support
- Provide proactive customer service
- Ensure production excellence

## Cost-effective

### Complete cases

Buckeye Shapeform has become an industry leader by making it quick, easy, and cost-effective for audio-visual equipment manufacturers to source cases that are ready for installation. And while the idea of a “complete case” is something that competitors like to talk about, Buckeye Shapeform has specialized in this area of business for years. We’re not a fabrication shop...we just act like one when it comes to customizing our standard products. Simply put, “Completing the Case” is what we do best, all under one roof. It’s the very heart of our business. And because we create enclosures from design to screen-printing in one shop, you save time and money.

### Reliable flexibility

Today’s customer is often strapped for time and internal resources and may only place periodic orders throughout the year. We’ve succeeded in working with just that type of customer. You can rely on Buckeye Shapeform to:

- Handle all the details of getting your cases ready for production
- Deliver your projects on time
- Complete your projects per spec

### Let us help you

In your efforts to provide the highest-performing, most user-friendly, and most cost-effective A/V solutions to your customers, Buckeye Shapeform is in a unique position to assist. It is our business to help you. Our talents meet your needs for performance, ease-of-use, and economy in a dynamic audio-visual market.

**“...high-performance A/V products facilitate the integration of multiple components in auto, home, business and educational settings... to help A/V equipment manufacturers provide such complexity to consumers, Buckeye Shapeform’s high-performance enclosure customization services are unmatched in the industry.”**
