a complete line of enclosure solutions...

● versa flex

● e-series

● bmx/bmu

● sub-racks

● versa flex

This handsome case is precision crafted for the ultimate in flexibility, efficiency and style. Its strong inner frame provides strength and 100% interior space utilization. It is convertible from a desktop case to a rackmount case without disassembling.

● bmx/bmu series

This sophisticated instrumentation case features concealed fasteners for a clean appearance. The side extrusions come with pre-punched holes for mounting on interior surfaces.

● e-series

This enclosure series made with an aluminum extrusion, is lightweight, rugged and economical. It is produced with a solid tube and comes in 2 and 4 piece designs. The internal grooves are designed for direct PCB insertion. Handheld, desktop and panel mount versions are available.

● sub-rack series

This enclosure series is designed to follow Eurocard/VME/VXI/Multibus II specifications. All enclosures accommodate backplanes or DIN 41612 connectors.

flex-i-pak

dii series

plastic enclosures

kbs series

flex-i-pak series

The Flex-i-pak series features extruded side panels, providing excellent weight handling. This enclosure series includes desktop or rackmount variations and can be customized with vertical or horizontal internal racks.

plastic enclosures (pet)

The plastic enclosure series is based on customer requirements and features a proprietary folding process. All of the plastic enclosures are made from a standard plastic material ranging from 3mm to 10mm in thickness. No mold charges.

standard cases

The DII, DSC and RP series of cases make up our group of standard enclosures. The DII and DSC cases utilize extruded side panels, while the RP case uses extruded rail frame construction. All standard cases offer desktop and rackmount versions.

additional standard cases

The KBS, Buck-i-pack and Front Loading series of cases make up our group of additional standard enclosures. All of these enclosures utilize rugged aluminum construction. The KBS series is a slant front case.

jr series

xpand-a® series

fc series

sm series

fc series

The FC series is an excellent choice for communications applications. This series comes in either formed aluminum or an extruded side panel case. Desktop and rackmount versions are available.

jr series

The contemporary design of the JR series uses sturdy aluminum construction and concealed fasteners. The removable top panel allows access to internal electronics.

sheet metal series (sm)

This enclosure series is an economical solution for rackmount applications. These cases feature vented and non-vented versions and includes an internal chassis as an optional feature.

xpand-a® series

The Xpand-a® series provides customized packaging at a standard package price. All cases utilize standard extrusions to secure side panels of any size. The extrusions conveniently allow direct insertion of PCB and internal panels.

● deep draw technology

novelty cans ●

● knobs

Our work with Buckeye Shapeform goes back over 20 years. Over the years, we have created a tight bond with them and it has made us feel like part of the family. Their responsiveness and ability to handle challenges really keeps us coming back. They consistently bend over backwards to get the job done and continue to impress us with quality work."

Mary Anne Taylor
Program Test Sources

● deep draw technology

A key technology partner for the military's Hellfire and TOW missile systems, and a leader in the development and refining of precision drawn metal parts with the tightest of tolerances, multiple wall thicknesses, and multiple diameters.

novelty cans ●

For over 100 years, a leading supplier of seamless tin containers for the cosmetic, candle, printing and novelty gift industries, featuring a wide range of sizes.

● knobs

Delivering superior quality, durability and economy for the test and measurement, broadcast, industrial cooking, welding, music and other manufacturing, technology and service industries.

choose the enclosure that will best
meet your needs.

representative will place your order.

complete the case

We're not a fabrication shop...we just act like one when it comes to customizing our standard products. We'll take any one of our cases and customize it to whatever spec you have in mind. Simply put, "Completing the Case" is what we do best. It's the very heart of our business. **Reference the accessories and customization brochures to see the endless possibilities to customize your case.**

products that **perform** from a
company that **delivers**.

What sets Buckeye Shapeform apart from its competitors is the level of technical support, customization and value-added services that we provide in-house. Whether you're up against an impossible deadline, or you're simply stretched for resources, you'll find that Buckeye goes the extra mile in ways that our competitors simply can't...or won't. We welcome the small order, and we take pride in our production excellence and on-time delivery statistics, which are the envy of companies everywhere.
