

serving the needs of
telecommunications
industry leaders

Speed, sophistication and specialization

Technological advancement in the telecommunications industry happens just as fast as the data zipping through the air or via fiber-optic cables. In an age when consumers demand speed, innovation, and specialized communication devices and infrastructure, success is a matter of providing the latest, fastest, and highest-quality products and services possible. Fortunately, Buckeye Shapeform is in the business of helping telecommunications industry leaders make that happen.

As a leader in the creation of enclosures for telecommunications equipment manufacturers, Buckeye Shapeform is known for its speedy delivery, case customization, and ability to handle your unique project, big or small. And to help you meet consumer demand for devices and infrastructure that can handle ever-increasing amounts of data at lightning-fast speeds, Buckeye Shapeform delivers production-ready, per-spec enclosures on time, every time.

While the idea of a “complete case” is something that competitors like to talk about, Buckeye Shapeform has specialized in providing unlimited customization for years. We’re not a fabrication shop...we just act like one when it comes to customizing our standard products.

Speed

Rapid innovation

Not only are telecommunications industry leaders expected to make data transfer as fast as possible, but technological innovation in the 21st century moves at breathtaking speeds. The habits of today’s savvy consumer cause telecommunications products and services to become obsolete seemingly overnight.

On-time delivery

Because you are in the business of providing speedy data transfer, we demand speed from ourselves. Buckeye Shapeform will:

- Help you quickly adapt to consumer demand for new products and services
- Meet impossible deadlines
- Go the extra mile, faster, in ways our competitor simply can’t...or won’t.
- Take pride in on-time and per-spec delivery
- Make it quick and easy to source cases that are ready for installation

Sophistication

Case customization

Today's complicated telecommunications applications require a level of sophistication and expertise unknown to past generations, and the enclosures housing the applications are no exception. While the idea of a "complete case" is something that competitors like to talk about, Buckeye Shapeform has specialized in providing unlimited customization for years. We're not a fabrication shop... we just act like one when it comes to customizing our standard products. We'll take any one of our cases and customize it to whatever spec you have in mind. Simply put, "Completing the Case" is what we do best. It's the very heart of our business.

One-stop shop

Starting with a broad selection of standard products in a range of configurations and sizes, Buckeye Shapeform assists customers with selection and design by providing engineering support and tools like AutoCAD and 3D modeling. We also provide the following customization services, all under one roof.

- Punching holes
- Self-cinching inserts
- Machining
- Special sizes
- Finishing
- Shielding
- Masking
- Screen printing
- 3D modeling

To help you meet consumer demand for devices and infrastructure that can handle ever-increasing amounts of data at lightning-fast speeds, **Buckeye Shapeform delivers production-ready, per-spec enclosures on time, every time.**

Specialization

Unique orders

Buckeye Shapeform appreciates that your company provides a unique telecommunications product or service. We understand that you may only place periodic orders throughout the year. We've succeeded in working with just that type of customer. We welcome the small order. Yet regardless of the size of the order or the enclosure, our specialty is providing an aesthetically-pleasing, precision-manufactured enclosure for all types of telecommunications applications. And because this is our specialty, our level of customer service is unmatched in the industry.

Fit to your needs

We'll work together to create the most cost-effective enclosure to meet all your needs. Buckeye offers

- A complete line of off-the-shelf telecommunications instrumentation enclosures / equipment housings
- Modification of any standard enclosure to better support your requirements
- A complete customized housing in either metal or plastic material.

Our design team will work with you to create the best case for your specific project, regardless of its scope.

Let us help you

In your efforts to provide the latest, fastest, and highest-quality products and services to your customers, Buckeye Shapeform is in a unique position to assist. It is our business to help you. Our talents meet your needs for speed, sophistication and specialization in a dynamic telecommunications market.

As a leader in the creation of enclosures for telecommunications equipment manufacturers, Buckeye Shapeform is known for its speedy delivery, case customization, and ability to handle your unique project, big or small.
