

serving the needs of
medical equipment
industry leaders

Innovation, precision and specialization

Advancement in the diagnosis and treatment of the myriad ailments afflicting the human body is rapid. Today's cutting-edge technologies and therapies can quickly become tomorrow's relics. With an aging population expecting the health care industry to provide early diagnosis and the latest treatment options, the success of manufacturers of medical supplies, devices, and imaging technologies rests on their ability to provide the latest and most precise specialized products possible. Fortunately, Buckeye Shapeform is in the business of helping medical equipment industry leaders make that happen.

As a leader in the creation of enclosures and other components for medical supplies, devices, and imaging technologies, Buckeye Shapeform is known for its innovative design and production techniques, such as our deep draw technology, that result in precise specialized products of any shape and size. And to help you meet the demand for supplies, devices, and technology that satisfy the expectations of today's health care consumer, Buckeye Shapeform delivers production-ready, per-spec enclosures and components on time, every time.

To help you meet the demand for supplies, devices, and technology that satisfy the expectations of today's health care consumer, Buckeye Shapeform delivers production-ready, per-spec enclosures and components on time, every time.

Innovation

Emerging technologies

Medical industry suppliers know better than anyone that technological innovation allows us to address an increasing number of medical ailments earlier and more effectively than at any time in history. Yet, this rapid industry innovation increases the risk of technology obsolescence. Success is then determined by your ability to create new diagnostic capabilities, deliver product offerings to exploit new growth opportunities, and ultimately to improve patients' lives. Buckeye Shapeform can help you stay ahead of consumer demand. Because innovation drives your business, we demand innovation from ourselves.

Creative expertise

Whether you're launching the latest product or simply retooling an existing one, Buckeye Shapeform goes the extra mile in ways that our competitors simply can't...or won't. To make your

innovative product come to life and to make complicated jobs easy, Buckeye boasts:

- A highly experienced design team
- The latest emerging design and fabrication technologies
- Engineering expertise

Precision

Critical accuracy

Precisely designed and created medical equipment can mean the difference between life and death for critically ill patients. The sophistication of diagnostic and treatment technologies requires components that are virtually flawless, every time. That's why Buckeye Shapeform continually refines its technology to deliver optimal results.

Flawless performance

Buckeye Shapeform is a leader in the development and refining of precision-drawn metal parts. Our deep-draw products and custom enclosures have set Buckeye Shapeform apart for their

- Superior quality
- Durability
- Economy in multiple test, measurement, and technology applications.
- Tightest of tolerances and endless shapes and sizes

Medical industry suppliers know better than anyone that technological innovation allows us to address an increasing number of medical ailments earlier and more effectively than at any time in history. Yet, this rapid industry innovation increases the risk of technology obsolescence... Buckeye Shapeform can help you stay ahead of consumer demand.

Specialization

Unique needs

Buckeye Shapeform appreciates that your company provides a unique product servicing the medical industry. We understand that you may only place periodic orders throughout the year. We've succeeded in working with just that type of customer. We welcome the small, custom order. Yet regardless of the size of the order or the product, our specialty is providing an aesthetically-pleasing, precision-manufactured enclosure or other component for all types of medical applications. And because this is our specialty, our level of customer service is unmatched in the industry.

Custom creation

We'll work together to create the most cost-effective component or component-housing to meet all your needs. We offer:

- A diverse off-the-shelf enclosure line
- A second-to-none ability to design and create any kind of metal or plastic component
- Enclosure customization services to meet your unique requirements
- Superb customer service for you and your project, regardless of its scope

Let us help you

In your efforts to provide the most innovative, precise, specialized products to your customers, Buckeye Shapeform is in a unique position to assist. It is our business to help you. Our talents meet your needs for innovation, precision, and specialization in a dynamic medical supplies and devices market.
